

How to Find Network Providers

1. Choose "Search the Network" and click the network logo that appears on your medical ID card.

2. Enter your group's unique Login:
Client ID: 1909
Password: vfdjp

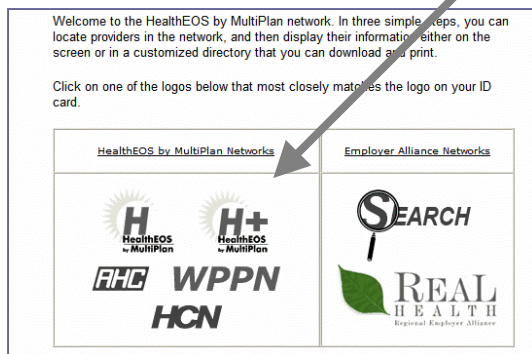

Guest Login

A log in is always recommended because not all providers in the network are available to every health plan used by our customers. A log in ensures you get access to only those providers who participate with your plan. If you do not know your log in, you may search the HealthEOS by MultiPlan network without logging in. However, your search results may include healthcare providers that aren't available to your specific plan. It is your responsibility to confirm participation in order to avoid out-of-network costs.

Please enter your ID and password and log in below, or [click here](#) to search the entire HealthEOS by MultiPlan network. If you need assistance with an ID and password, call 1-800-279-9776.

Client or Guest ID

Password

3. Enter optional parameters to refine your search:

- Provider type(s)
- Keyword(s)
- Location(s)
 - ✓ State
 - ✓ County
 - ✓ Zip code radius

4. Choose your desired output:

- Display as list
- Create a printable directory in rich text format (.rtf)

Please enter your search parameters using the form below. All providers meeting your criteria will be displayed in alphabetical order

Search for

Whose name contains (example: "Smith,Bill" NOT "Bill Smith")

Located in (Counties will show up once a state is selected)

County

Hold down control key to select more than one.

Specializing in

Search by Proximity

Zip (Enter Zipcode and select a miles radius)

Within

Display as list.

Make Formatted Directory (sort by State, then Name)
